DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-6 are rejected under 35 U.S.C. 102(b) as being anticipated by Cunningham et al. (US Patent No. 6,366,294).

Regarding claim 1, Cunningham discloses a display interface method copying an object from a first folder to a second folder, comprising zooming the object in the first folder, so as to be seen on a display screen [zooming in displaying object; see col. 5, lines 40-67]; selecting the zoomed object for copying [..representational data or snapshot data, which defines certain visual characteristics of an object; see col. 6, lines 1-55]; storing a pointer to the selected object in a memory (see col. 7, lines 11-51); and displaying a representation of the selected object, as a small image on a foreground layer of the display screen [zooming in or out; see col. 8, lines 1-30).

Regarding claim 2, Cunningham discloses wherein the copying of the object is performed by using a zoom interface (see col. 8, lines 39-67).

Regarding claim 3, Cunningham discloses wherein the object in the first folder is an image file, and the representation is a thumbnail image, or the object in the first folder is a text file, and the representation is an icon (see col. 9, lines 1-41).

Art Unit: 2173

Regarding claim 4, Cunningham discloses wherein displaying the representation of the selected object comprises extracting an object from a clipboard (see col. 12, lines 35-67).

Regarding claim 5, Cunningham discloses further comprising selecting the second folder for pasting; and generating a copy of the object, pointed to by the stored pointer, in the second folder (see col. 13, lines 10-55).

Regarding claim 6, Cunningham discloses selecting the second folder for link generation; and generating an icon representing linking information, to the object in the first folder, as a new object in the second folder (see col. 15, lines 7-67).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure (see PTO-892).
